Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-2, 10-12 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Veringa et al. Fig. 1 of Veringa et al discloses a free piston Stirling engine 2 including a displacer 14, a housing within which displacer 14 reciprocates in both a first axial direction and a second axial direction, and a machined spring 15 attached at a first end to said displacer 14 and providing a constraining force upon said displacer when said displacer moves in either said first axial direction or said second axial direction.
2. With reference to applicant's argument that spring 15 of Veringa et al is of the conventional helical wire type, rather than a machined spring as recited in the instant claims, it should be noted that the term "machined spring" does not recite sufficient structure to define over the helical spring taught in Veringa et al.
3. With respect to applicant's argument that the recited machined spring can control movement in both axial directions, it should be noted that spring 15 in Veringa et al is considered to be able to provide a constraining force in each of two axial directions.
4. Claims 3 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Veringa et al. The additionally recited

Art Unit: 3748

subject matter is considered to be an obvious design choice involving elements deemed to be obvious and well known in the art area of the invention.

5. Claims 4-8 and 13-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
